Anti-burglary security grilles

The Crime Barriers

Physical security for all domestic commercial & industrial applications.

The perfect balance of style & strength

Merry Hill Office Park, Birmingham

Trellidor protects property...

...and retracts out of sight during business hours

The original retractable security grilles from the inte

Trellidors have been protecting people and their possessions since 1976 and are sold in 40 countries around the world.

- Patented award winning 2pt locking Trellilok, integral to the frame - no ugly external locks.
- Light but strong.
- Top hung - light to the touch and smooth operation.
- Easy to clean aluminium sill with no roller on the ground to pick up dirt.
- Unique tamper proof fixings.
- Quick and easy to install.
- Tailor-made to suit your needs.
- Common installations include:
 - Airports
 - Corporate offices
 - Banks
 - Jewellery stores
 - Museums
 - Public sector buildings
 - Shopping centres
 - Industrial
 - Police stations
 - Homes
 - Petrol forecourts
 - Military installations

Trellidor is a fully framed retractable security grille, which expands to secure the whole of the opening, and is positively restrained along all four edges of the perimeter. When access is required, the grille is unlocked and parted at a point within the span, or at the left or right hand side, according to the configuration. The grille is then retracted into a compact stack on either or both sides of the opening.

The entire range of grilles can be supplied in a retractable or fixed format. Many buildings have apertures that do not need access but still require security. By supplying a fixed grille that matches the retractable grilles for these apertures it is possible to reduce costs and maintain the style of the building.

Other configurations of the Trellidor have been individually developed to meet specific market requirements. For example:

- Hinge-away unit
- Hinge-up bottom track
- Cut-in tracks
- Removable track
- Angle units
- Covered track
- Side-by-side
- Electric access control

As a result Trellidors are now being used in thousands of installations varying enormously in scope and application.

Trellidor - security & style inside and out

Trellidor's light but strong construction is aesthetically pleasing without compromising security.

Some technical information

- Galvanised steel construction provides greater corrosion resistance.
- Trellidor's patented, award winning Trelllok is one of the strongest locks on the market.
- Trellidor's "slam-lock" option can be left in the ready to lock position, with the key removed and then locked with a push.
- Links cross a minimum of three uprights meaning that the door opens and closes uniformly and adds to the integrity.
- Rolled steel uprights enclosing Polyamide 6 components.
- Two point locking from a single key point.

3 year guarantee

Trellidor grilles are available in an attractive stock range of colours (as indicated above), utilizing high quality ultra violet resistant polyester powder coatings suitable for interior and exterior use. Additionally they can be supplied in any standard RAL number and can be matched to decor or corporate identity. These colours are representative only. For an exact match please call for a swatch.

The Trellidor Security Group, the UK home of Trellidor, Trellidor Plus, Trellidor Trojan, Valudor and GriffinGuard, is based in the West Midlands. We have been a force in the physical barrier security industry since 1976 and we are represented in 40 countries internationally.

All installations are undertaken by trained professionals located throughout the UK.
